

## Jael Roman

(925) 502 - 5672 | romanjael1@outlook.com | [Personal GitHub](#) & [Student GitHub](#) | [LinkedIn](#) | [Student Portfolio](#)

Computer Science student with experience developing production full-stack software applications using JavaScript, TypeScript, React, Node.js, SQL and REST APIs. Experienced collaborating on cross-functional engineering teams through Git-based development workflows while contributing to frontend, backend, API and cloud-based software systems.

## Education

**California State University of Monterey Bay**, Monterey CA.

- Bachelor of Science in Computer Science (Expected: May 2027)

**Evergreen Valley College**, San Jose CA.

- Associates Degree in Computer Science for Transfer

## Certificates

Meta Front-End Developer Professional Certificate - Coursera (August 2025) | Certificate of Achievement in Computer Programming – Evergreen Valley College (May 2024)

## Technical Skills

**Languages:** JavaScript, TypeScript, Python, SQL, PHP, HTML, CSS

**Frameworks & Technologies:** React.js, Next.js, Node.js, Express.js, PostgreSQL, MySQL, Supabase, Redis, Docker

**Tools & Platforms:** Git, GitHub, Cloudflare, Render, Vercel, Jira, Confluence, Figma, VS Code, IntelliJ

**CS Fundamentals:** Object-Oriented Programming, Data Structures & Algorithms, Big-O Analysis, REST APIs, Client-Server Architecture

## Technical Projects

### Medication Organizer | Full-Stack Web Application

JavaScript, Node.js, Express.js, HTML, CSS, REST APIs

- Designed and developed a full-stack medication management app using Node.js, Express, SQL and REST APIs featuring secure user authentication, medication tracking, and dynamic client-server communication.
- Implemented interactive medication management features allowing users to add, edit, and delete medications and record doses as taken or missed.
- Integrated client-side JavaScript with backend API endpoints to dynamically retrieve and update user medication data.
- Added application-level error handling and fallback messaging to provide clear feedback when API requests fail.

### Marco & Ruth Cleaning & Handyman | [Small-Business Website](#)

React / Next.js, TypeScript, Tailwind CSS, Cloudflare

- Designed and developed a responsive production website for a local cleaning business, translating real client requirements into a polished, customer-facing web experience.
- Built reusable responsive UI components and optimized layouts across desktop & mobile devices, including interactive visual elements and customized service content.
- Implemented automated contact form processing and email delivery using server-side APIs to connect prospective customers directly with the business.
- Configured a custom business domain and production email infrastructure, including DNS,

- SPF, and DKIM records for authenticated email delivery.
- Deployed and maintained website through Cloudflare, troubleshooting production configuration, and email delivery issues.

## **Work Experience**

### **SmartLeads - Remote, CA**

Full-Stack Developer | March 2026 – Present

- Contributed to the development of a production-oriented lead generation platform using TypeScript and Node.js, working across frontend, backend, third-party APIs, and application infrastructure.
- Implemented and tested Stripe-based AI credit purchasing functionality, integrating checkout flows, credit packages, payment handling, and application usage state.
- Contributed to backend campaign-processing infrastructure using BullMQ and Redis to support asynchronous recipient processing, rate handling, job completion, and failure tracking.
- Worked with Telnyx SMS integrations and Supabase persistence support personalized campaign messaging, message delivery, and campaign result tracking.
- Debugged frontend and backend application issues, validated API behavior, payment flows, asynchronous processing, and production deployments.
- Collaborated with large existing engineering codebase using Git-based development workflows while implementing production features and resolving application issues.

### **SkyIT Services - Remote, CA**

Front End Developer Intern | January 2026 – March 2026

- Analyzed frontend architecture, component structures, state-management patterns, REST APIs integrations, and application data flows.
- Produced standardized technical documentation in Confluence for developer onboarding and long-term engineering reference.
- Served as Intern Team lead, coordinating Jira tasks and mentoring interns on documentation practices, tooling and task completion.

### **Apple - Cupertino, CA**

US Specialist | July 2025 – December 2025

- Translated technical concepts into customer-facing solutions while maintaining current knowledge of Apple hardware, software and ecosystems integrations.

### **Tesla - Fremont, CA**

Quality Technician II | March 2023 – March 2024

- Collaborated with software engineers to provide UI/UX feedback for internal manufacturing web tools used in vehicle production
- Responsible for maintaining vehicle inspection and quality by staying up to date with daily specification changes with cross-functional teams.
